ACTA METALLURGICA ET MATERIALIA

CONTENTS AND AUTHOR INDEX
VOLUME 42
1994

Board of Directors

Professor Gareth Thomas
Dr William W. Scott Jr
Professor Karl A. Gschneidner Jr
Dr Paul S. Follansbee
Professor Veikko Lindroos
Professor Peter Neumann
Professor J. Th. M. De Hosson
Professor David R. F. West

Dr Robert L. Fullman, *Secretary–Treasurer*

Professor Tadeusz B. Massalski, *Chairman*

Editor

Professor Michael F. Ashby, University Engineering Laboratories, University of Cambridge, Trumpington Street, Cambridge CB2 1PZ, England

Deputy Editor

Dr L. Greer

Assistant to the Editor

Mrs Irene Kightley

Associate Editors

Professor Carlos A. Pampillo (*Argentina*)
Professor I. Polmear (*Australia*)
Professor B. Lux (*Austria*)
Professor L. Delaey (*Belgium*)
Professor M. A. Mannheimer (*Brazil*)
Professor W. Tyson (*Canada*)
Professor J.-M Xiao (*China*)
Professor V. Lindroos (*Finland*)
Professor L. P. Kubin (*France*)
Profesor Reiner Kirchheim (*Germany*)
Professor S. Ranganathan (*India*)
Professor David G. Brandon (*Israel*)
Dr M. Vittori (*Italy*)
Professor T. Mori (*Japan*)
Professor N. J. Kim (*Korea*)
Professor M. J. Yacaman (*Mexico*)
Professor J. T. M. De Hosson (*The Netherlands*)
Professor V. L. Indenbom (*Russia*)
Professor F. R. N. Nabarro (*South Africa*)
Professor M. Elices (*Spain*)
Professor Mats Hillert (*Sweden*)
Professor John P. Hirth (*U.S.A.*)

ACTA METALLURGICA ET MATERIALIA
CONTENTS OF VOLUME 42

NUMBER 1

Qing Ma and R. W. Balluffi	1	Overview No. 109: Random walk model for self-diffusivities and correlation factors in periodic grain boundaries
R. Trivedi and W. Kurz	15	Overview No. 110: Solidification microstructures: a conceptual approach
S. H. Han and R. Trivedi	25	Primary spacing selection in directionally solidified alloys
O. Blaschko, R. Glas, G. Krexner and P. Weinzierl	43	Stages of surface and pore volume evolution during sintering
C. Hu and T. N. Baker	51	The liquid volume control in the ISM process applied to the Al–Fe system
I. A. Rauf and L. M. Brown	57	*In situ* study of amorphous to crystalline transition in indium oxide thin films using transmission electron microscopy
D. S. Farquhar, S. L. Phoenix and R. Raj	65	Determination of fracture toughness and bridging tractions from crack-opening displacement measurements in particulate composites of diamond in zinc sulfide
Y.-L. Shen, M. Finot, A. Needleman and S. Suresh	77	Effective elastic response of two-phase composites
B. Cotterell, Shi-Qi He and Yiu-Wing Mai	99	Fatigue of sintered steel
Xing-gang Jiang, Wu-yang Chu and Ci-mei Hsiao	105	Relationship between J_{1c} and fractal value of fracture surface of ductile materials
F. Povolo and H. O. Mosca	109	Zener relaxation strength in b.c.c. and f.c.c. alloys under torsional and longitudinal excitations
M. G. Zelin, N. A. Krasilnikov, R. Z. Valiev, M. W. Grabski, H. S. Yang and A. K. Mukherjee	119	On the microstructural aspects of the nonhomogeneity of superplastic deformation at the level of grain groups
Yuan Zhexi, Song Shenhua, R. G. Faulkner and Xu Tingdong	127	Effect of cerium on temper embrittlement of P-doped Mn structural steels
M. Militzer, W. P. Sun and J. J. Jonas	133	Modelling the effect of deformation-induced vacancies on segregation and precipitation

K. S. Ravichandran	143	Fracture toughness of two phase WC–Co cermets
J. Llorca	151	A numerical study of the mechanisms of cyclic strain hardening in metal–ceramic composites
C. Biselli and D. G. Morris	163	Microstructure and strength of Cu–Fe *in situ* composites obtained from prealloyed Cu–Fe powders
G. I. Rosen and D. Shechtman	177	Formation of microstructure of the icosahedral phase in rapidly solidified aluminium–chromium alloys
S. Duval, S. Chambreland, P. Caron and D. Blavette	185	Phase composition and chemical order in the single crystal nickel base superalloy MC2
Jian Sun and Dongliang Lin (T. L. Lin)	195	Theoretical and positron annihilation study of point defects in intermetallic compound Ni_3Al
G. Schmitz, K. Hono and P. Haasen	201	High resolution electron microscopy of the early decomposition stage of Al–Li alloys
L. Shaw and R. Abbaschian	213	Toughening $MoSi_2$ with niobium metal—effects of size and orientation of ductile laminae
J. E. Benci, D. P. Pope and J. L. Bassani	225	A combined experimental and analytical investigation of creep damage development in copper
M. J. Philippe, F. Wagner, F. E. Mellab, C. Esling and J. Wegria	239	Modelling of texture evolution for materials of hexagonal symmetry—I. Application to zinc alloys
J. H. Chen, C. Yan and J. Sun	251	Further study on the mechanism of cleavage fracture at low temperatures
K. H. Yang and W. K. Choo	263	The variants of the orientation relationship between austenite and cementite in Fe–30wt%Mn–1.0wt%C alloy
Gang Liu, Zhehua Zhang and J. K. Shang	271	Interfacial microstructure and fracture of Al_2O_3 particulate reinforced Al–Cu composite
W. P. Sun and J. J. Jonas	283	Influence of dynamic precipitation on grain boundary sliding during high temperature creep
S. Lartigue Korinek and F. Dupau	293	Grain boundary behavior in superplastic Mg–doped alumina with yttria codoping
M. A. Mulla and V. D. Krstic	303	Mechanical properties of β-SiC pressureless sintered with Al_2O_3 additions
C. H. J. Davies, N. Raghunathan and T. Sheppard	309	Ageing kinetics of a silicon carbide reinforced Al–Zn–Mg–Cu alloy
G. Subhash, Y. J. Lee and G. Ravichandran	319	Plastic deformation of CVD textured tungsten—I. Constitutive response

G. Subhash, Y. J. Lee and G. Ravichandran — 331 — Plastic deformation of CVD textured tungsten—II. Characterization

I — *Acta Metallurgica et Materialia*—Associate Editors

NUMBER 2

B. N. Cox and D. B. Marshall — 341 — Overview No. 111: Concepts for bridged cracks in fracture and fatigue

N. A. Fleck, K. J. Kang and M. F. Ashby — 365 — Overview No. 112: The cyclic properties of engineering materials

R. Goswami and K. Chattopadhyay — 383 — Microstructural evolution and transformation pathways in the near monotectic Zn rich Zn–Bi alloys during rapid solidification

J. Zhang, R. J. Perez and E. J. Lavernia — 395 — Effect of SiC and graphite particulates on the damping behavior of metal matrix composites

W. Guo, S. Martelli and M. Magini — 411 — Effect of alloying addition on structure and thermal stability of $Ti_{40}Al_{60}$ prepared by mechanical alloying

P. B. Prangnell, D. Özkaya and W. M. Stobbs — 419 — Discontinuous precipitation in high Li content Al–Li–Zr alloys

J. Svoboda, H. Riedel and H. Zipse — 435 — Equilibrium pore surfaces, sintering stresses and constitutive equations for the intermediate and late stages of sintering—I. Computation of equilibrium surfaces

H. Riedel, H. Zipse and J. Svoboda — 445 — Equilibrium pore surfaces, sintering stresses and constitutive equations for the intermediate and late stages of sintering—II. Diffusional densification and creep

F. C. Lovey, V. Torra, A. Isalgué, D. Roqueta and M. Sade — 453 — Interaction of single variant martensitic transformation with small γ type precipitates in Cu–Zn–Al

Z. X. Guo and B. Derby — 461 — Theoretical model for solid-state consolidation of long-fibre reinforced metal-matrix composites

N. A. Fleck, G. M. Muller, M. F. Ashby and J. W. Hutchinson — 475 — Strain gradient plasticity: theory and experiment

Kuo-Chung Liu, G. Thomas, A. Caballero, J. S. Moya and S. de Aza — 489 — Mullite formation in kaolinite–α-alumina

Fashang Ma and Zhen-Bang Kuang — 497 — Stresses, deformations and porosities in standard fracture specimens

Z. L. Wu and D. P. Pope — 509 — $L1_2$ Al_3Ti-based alloys with Al_2Ti precipitates—I. Structure and stability of the precipitates

Z. L. Wu and D. P. Pope	519	$L1_2$ Al_3Ti-based alloys with Al_2Ti precipitates—II. Deformation behavior of single crystals
M. J. Aziz and W. J. Boettinger	527	On the transition from short-range diffusion-limited to collision-limited growth in alloy solidification
S. Nakashima, K. Takashima and J. Harase	539	Effect of thickness on secondary recrystallization of Fe–3%Si
Z. W. Huang, M. H. Loretto, R. E. Smallman and J. White	549	The mechanism of nucleation and precipitation in 7075-0.7 Li alloy
H. Mizubayashi, S. Odai and S. Okuda	561	Hydrogen Gorsky effect in amorphous $Cu_{50}Ti_{50}$
Jong K. Lee and Weimin Tao	569	Coherent phase equilibria: effect of composition-dependent elastic strain
M. Bobeth, W. Pompe, M. Rockstroh and E. Schumann	579	Morphological instability of a planar oxide–alloy interface for inward oxide growth
Daping Yao and J.-K. Shang	589	Frequency dependence of fatigue crack growth in a TiB_2–SiC composite at elevated temperature

NUMBER 3

	iii	Editorial Announcement
A. M. Othman, B. F. Dyson, D. R. Hayhurst and J. Lin	597	Continuum damage mechanics modelling of circumferentially notched tension bars undergoing tertiary creep with physically-based constitutive equations
P. G. Marsh and W. W. Gerberich	613	A microscopically-shielded Griffith criterion for cleavage in grain oriented silicon steel
Y. Liu	621	Internal friction associated with dislocation relaxations in virgin martensite—interpretation
M. Ahmed, A. Ali, S. K. Hasnain, F. H. Hashmi and A. Q. Khan	631	Magnetic properties of maraging steel in relation to deformation and structural phase transformations
H. Huang and W. W. Gerberich	639	Quasi-equilibrium modeling of the toughness transition during semibrittle cleavage
S. P. Dhandapani, V. Jayaram and M. K. Surappa	649	Growth and microstructure of Al_2O_3–SiC–Si(Al) composites prepared by reactive infiltration of silicon carbide preforms

Shen Huimin, Zhang Zhifang, Yang Yanqing, Rui Limin, Wang Yening and Shen Guangjun	657	The pre-bainitic transformation in Cu–Zn–Al–Mn alloy
I. M. Robertson	661	Effect of steel metallurgy on its magneto-mechanical behaviour in weak magnetic fields
Kyung-Tae Park, Enrique J. Lavernia and Farghalli A. Mohamed	667	High-temperature deformation of 6061 Al
H. K. Kim and J. C. Earthman	679	High temperature deformation and fracture mechanisms in a dendritic Ni_3Al alloy
L. M. Gonzalez, F. L. Cumbrera, F. Sanchez-Bajo and A. Pajares	689	Measurement of fiber orientation in short-fiber composites
H. F. Wang, J. C. Nelson, W. W. Gerberich and H. E. Deve	695	Evaluation of *in situ* mechanical properties of composites by using nanoindentation techniques
K. S. Vecchio, Li-Hsing Yu, and M. A. Meyers	701	Shock synthesis of silicides—I. Experimentation and microstructural evolution
M. A. Meyers, Li-Hsing Yu and K. S. Vecchio	715	Shock synthesis of silicides—II. Thermodynamics and kinetics
K. Hilfrich, W. Petry, O. Schärpf and E. Nembach	731	Phase diagram, superlattices and antiphase domains of Fe_3Al_x, $0.75 \leqslant x \leqslant 1.3$, investigated by neutron scattering
K. Hilfrich, W. Kölker, W. Petry, O. Schärpf and E. Nembach	743	The states of order and the phase diagram of $Fe_{1-x}Si_x$, $0.06 \leqslant x \leqslant 0.20$, investigated by neutron scattering
F. J. Humphreys and M. G. Ardakani	749	The deformation of particle-containing aluminium single crystals
M. G. Ardakani and F. J. Humphreys	763	The annealing behaviour of deformed particle-containing aluminium single crystals
V. Gupta, K. Anand and M. Kryska	781	Failure mechanisms of laminated carbon–carbon composites—I. Under uniaxial compression
K. Anand, V. Gupta and D. Dartford	797	Failure mechanisms of laminated carbon–carbon composites—II. Under shear loads
P. L. Ratnaparkhi and J. M. Howe	811	Structure and mechanism of bonding at a diffusion-bonded Al/SiC interface
Y. Wu, H. Liu and E. J. Lavernia	825	Solidification behavior of Al–Si/SiC MMCs, during wedge-mold casting

P. R. Rios	839	Abnormal grain growth in materials containing particles
C. P. Blankenship Jr and E. A. Starke Jr	845	Structure–property relationships in Al–Li–Cu–Mg–Ag–Zr alloy X2095
C. S. Lee and B. J. Duggan	857	A dislocation avalanche theory of shear banding
A. W. Pryce and P. A. Smith	861	Matrix cracking in crossply ceramic matrix composites under quasi-static and cyclic loading
L. Shi and D. O. Northwood	871	Strain-hardening and recovery during the creep of pure polycrystalline magnesium
M. Hölscher, D. Raabe and K. Lücke	879	Relationship between rolling textures and shear textures in f.c.c. and b.c.c. metals
H. Onodera, T. Abe and T. Yokokawa	887	Modeling of α/α_2 phase equilibrium in the Ti–Al system by the cluster variation method
K. T. Venkateswara Rao, G. R. Odette and R. O. Ritchie	893	Ductile-reinforcement toughening in γ-TiAl intermetallic–matrix composites: effects on fracture toughness and fatigue-crack propagation resistance
Jin Kon Kim and Duk Yong Yoon	913	The suppression of chemically induced liquid film migration in Co–Cu at high temperature
L. Méric, G. Cailletaud and M. Gaspérini	921	F.E. calculations of copper bicrystal specimens submitted to tension–compression tests
A. S. Krausz and K. Krausz	937	The deformation kinetics of the stress dependence of plastic deformation
R. Nagarajan and K. Chattopadhyay	947	Intermetallic Ti_2Ni/TiNi nanocomposite by rapid solidification
E. van der Giessen and V. Tvergaard	959	Development of final creep failure in polycrystalline aggregates
K. Eckler, D. M. Herlach and M. J. Aziz	975	Search for a solute-drag effect in dendritic solidification
H. C. Yi, S. W. Guan, W. W. Smeltzer and A. Petric	981	Internal oxidation of Ni–Al and Ni–Al–Si alloys at the dissociation pressure of NiO
H. A. Calderon, P. W. Voorhees, J. L. Murray and G. Kostorz	991	Ostwald ripening in concentrated alloys
H. Duong, M. Beeman and J. Wolfenstine	1001	High temperature creep behavior and substructure in KCl–KBr solid solution alloys
S. Nemat-Nasser and H. Deng	1013	Strain-rate effect on brittle failure in compression

Yunhong Zhou and T. H. North	1025	Numerical model for the effect of grain boundaries on the total amount diffused
D. Josell	1031	Interfacial free energies from substrate curvature measurements of the creep of multilayer thin films
V. Mahadev, K. Mahalingam, G. L. Liedl and T. H. Sanders Jr	1039	Very early stages of δ' precipitation in a binary Al–11.4 at.% Li alloy

NUMBER 4

J. W. Cahn and J. E. Taylor	1045	Overview No. 113: Surface motion by surface diffusion
J. W. Elmer, M. J. Aziz, L. E. Tanner, P. M. Smith and M. A. Wall	1065	Formation of bands of ultrafine beryllium particles during rapid solidification of Al–Be alloys: modeling and direct observations
A. Matsuzaki, H. K. D. H. Bhadeshia and H. Harada	1081	Stress affected bainitic transformation in a Fe–C–Si–Mn alloy
R. Lerf and D. G. Morris	1091	Static strain ageing of $L1_2$ Al_3Ti-based alloys
D. V. Wilson and P. S. Bate	1099	Influences of cell walls and grain boundaries on transient responses of an IF steel to changes in strain path
K. S. Ravichandran	1113	A simple model of deformation behavior of two phase composites
Y.-C. Lu, R. Dieckmann and S. L. Sass	1125	Formation of a new aluminum oxide with the composition AlO_2 by interfacial reaction between Pt and α-Al_2O_3
J. Skogsmo and A. Atrens	1139	Analytical electron microscopy of grain boundaries in high-strength steels
I. Levin, W. D. Kaplan, D. G. Brandon and T. Wieder	1147	Residual stresses in alumina–SiC nanocomposites
X. B. Zhou and J. Th. M. De Hosson	1155	Metal–ceramic interfaces in laser coated aluminium alloys
F. Wakai	1163	Step model of solution-precipitation creep
J. H. van der Merwe and G. J. Shiflet	1173	The role of structural ledges at phase boundaries—I. Interfaces with rectangular atomic nets
G. J. Shiflet and J. H. van der Merwe	1189	The role of structural ledges at phase boundaries—II. F.c.c.–b.c.c. interfaces in Nishiyama–Wasserman orientation
J. H. van der Merwe and G. J. Shiflet	1199	The role of structural ledges at phase boundaries—III. F.c.c.–b.c.c. interfaces in Kurdjumov–Sachs orientation

S. Matsumoto, A. Sato and T. Mori	1207	Formation of h.c.p. and f.c.c. twins in an Fe–Mn–Cr–Si–Ni alloy
J. Pan and A. C. F. Cocks	1215	A constitutive model for stage 2 sintering of fine grained materials—I. Grain-boundaries act as perfect sources and sinks for vacancies
J. Pan and A. C. F. Cocks	1223	A constitutive model for stage 2 sintering of fine grained materials—II. Effects of an interface reaction
T. J. Konno and R. Sinclair	1231	Crystallization of Co-sputtered amorphous cobalt–carbon alloys
W. Sinkler and D. E. Luzzi	1249	An electron diffraction investigation of the diffuse ω structure in quenched Ti–3d transition metal alloys
K. Ito, H. Inui, T. Hirano and M. Yamaguchi	1261	Plastic deformation of single and polycrystalline $CoSi_2$
A. van den Beukel	1273	On the size dependence of the diffusion coefficient in metallic glasses
L. Llanes, J. L. Bassani and C. Laird	1279	Cyclic response of polycrystalline copper—composite-grain model
K. E. Evans, M. A. Nkansah and I. J. Hutchinson	1289	Auxetic foams: modelling negative Poisson's ratios
M. Wall, C. E. Lane and C. A. Hippsley	1295	Fracture criteria for hydrogen and temper embrittlement in 9Cr1Mo steel
S. F. Corbin and D. S. Wilkinson	1311	The influence of particle distribution on the mechanical response of a particulate metal matrix composite
S. F. Corbin and D. S. Wilkinson	1319	Low strain plasticity in a particulate metal matrix composite
S. F. Corbin and D. S. Wilkinson	1329	Influence of matrix strength and damage accumulation on the mechanical response of a particulate metal matrix composite
H. Okuda and K. Osamura	1337	Computer simulation of the kinetics of phase decomposition with the $L1_2$ type ordering in an Ising lattice system at low temperature
J. Čermák and H. Mehrer	1345	Tracer diffusion of ^{14}C in austenitic Ni–Fe–Cr alloys
H. Kato, T. Koyari, M. Tokizane and S. Miura	1351	Stress–strain behavior and shape memory effect in powder metallurgy TiNi alloys
H. Kato, J. Dutkiewicz and S. Miura	1359	Superelasticity and shape memory effect in Cu–23at.%Al–7at.%Mn alloy single crystals
T. Geipel, K. P. D. Lagerlöf, P. Pirouz and A. H. Heuer	1367	A zonal dislocation mechanism for rhombohedral twinning in sapphire (α-Al_2O_3)

R. W. Beye and R. Gronsky	1373	Novel phases in the oxidation of γ-titanium aluminum
E. S. Koba, Yu. V. Milman and A. P. Rachek	1383	Effect of plastic deformation and high pressure working on the structure and microhardness of metallic glasses
S. Long, Z. Zhang and H. M. Flower	1389	Hydrodynamic analysis of liquid infiltration of unidirectional fibre arrays by squeeze casting
Tianyi Cheng and H. M. Flower	1399	High temperature X-ray diffraction investigation of nickel-rich NiAl and NiAl–TiB_2
G. Choi, S. Horibe and Y. Kawabe	1407	Cyclic fatigue in silicon nitride ceramics
L. Edwards and Y. H. Zhang	1413	Investigation of small fatigue cracks—I. Plastic deformation associated with small fatigue cracks
L. Edwards and Y. H. Zhang	1423	Investigation of small fatigue cracks—II. A plasticity based model of small fatigue crack growth
Zhirui Wang and Ruby J. Zhang	1433	Microscopic characteristics of fatigue crack propagation in aluminum alloy based particulate reinforced metal matrix composites
F. Dobeš, K. Kuchařová, A. Orlová, K. Milička and J. Čadek	1447	Interpretation of steady-state creep rate in mechanically alloyed Al–C–O alloys
L. M. Hsiung and N. S. Stoloff	1457	Low-energy dislocation structures in cyclically deformed Ni_3Al single crystals
T. Akbay, R. C. Reed and C. Atkinson	1469	Modelling reaustenitisation from ferrite/cementite mixtures in Fe–C steels
E. Schumann and M. Rühle	1481	Microstructural observations on the oxidation of γ'-Ni_3Al at high oxygen partial pressure
F. Y. Génin, W. W. Mullins and P. Wynblatt	1489	Capillary instabilities in polycrystalline metallic foils: experimental observations of thermal pitting in nickel
	I	*Acta Metallurgica et Materialia*—Associate Editors

NUMBER 5

A. Oehlert and A. Atrens	1493	Overview No. 114: Room temperature creep of high strength steels
C. F. Pezzee and D. C. Dunand	1509	The impingement effect of an inert, immobile second phase on the recrystallization of a matrix
J. F. Durodola and B. Derby	1525	An analysis of thermal residual stresses in Ti–6–4 alloy reinforced with SiC and Al_2O_3 fibres
H. Xiao and I. Baker	1535	Long range order and defect concentrations in NiAl and CoAl

C. P. Ling, Y. Estrin and P. G. McCormick	1541	Ramped oscillatory testing: a new technique to examine dynamic strain ageing
B. G. Pound	1551	The effect of aging on hydrogen trapping in β-titanium alloys
R. Jayaram and M. K. Miller	1561	An atom probe study of grain boundary and matrix chemistry in microalloyed NiAl
J. F. McCarthy	1573	Lattice gas cellular automata method for flow in the interdendritic region
M. A. Morris and T. Lipe	1583	Microstructural influence of Mn additions on thermoelastic and pseudoelastic properties of Cu–Al–Ni alloys
O. T. Midling and Ø. Grong	1595	A process model for friction welding of Al–Mg–Si alloys and Al–SiC metal matrix composites—I. HAZ temperature and strain rate distribution
O. T. Midling and Ø. Grong	1611	A process model for friction welding of Al–Mg–Si alloys and Al–SiC metal matrix composites—II. HAZ microstructure and strength evolution
H. C. Lin and S. K. Wu	1623	The tensile behavior of a cold-rolled and reverse-transformed equiatomic TiNi alloy
C. D. Liu, D. X. You and M. N. Bassim	1631	Cyclic strain hardening in polycrystalline copper
V. Yu. Novikov	1639	Secondary recrystallization or normal grain growth?
M. A. Fortes	1643	On the existence of a scaling relation in the evolution of cellular systems
Shu-Zu Lu, J. D. Hunt, P. Gilgien and W. Kurz	1653	Cellular and dendritic growth in rapidly solidified Al–Fe and Al–Cu alloys
